FAQ

- **HOW DOES IT WORK?**

- - Read our PDF - How the System Works

- **WHAT IS THE MINIMUM INVESTMENT REQUIRED?**

- - Deposit required for our system start from 250\$, but to get our system for free with our affiliate partner a minimum of 1000-2000\$.

- **WHICH BROKERS ARE SUPPORTED?**

- - MT4 or MT5, RB1, RB2, RB3 run in MT4. MT5 only supports RB1. Note: Please only use one of our affiliate brokers or a recommended broker. Some brokers perform very badly and this may result in losses.

- **WHAT IS THE AVERAGE PERFORMANCE?**

- - Average 5-15% monthly but can performance up to 20-40% in very good market conditions.

- **WHAT IS THE AVERAGE DRAWDOWN IN BAD MARKET PERIODS / CONDITIONS?**

- - Average drawdown -5% TO -20%

- **WILL THE DRAWDOWN RISK BE X3 WITH ALL ROBOTSYSTEMS RUN IN THE SAME ACCOUNT?**

- - With bad market conditions this can happen but running 3 systems on the same account means there are hedge protections which may protect the account from high drawdowns. This is because the 3 separate systems trade different FX pairs with different entry / exit strategies.

- **CAN I SELECT CUSTOM BUILD SETTINGS?**

- - As standard all RB1, RB2 and RB3 run in the same account with our standard risk. We provide a custom build alternative for clients, but this attracts extra costs / requirements. We support select systems here and even decrease or increase risk.

- **IS THIS INVESTMENT RISK FREE? ARE THERE ANY GUARANTEES?**

- - NO, risk-free investments do not exist and cannot be guaranteed! However, our system has been built to provide a good return and minimize possible losses. We constantly optimize our systems according to the current market. We are transparent and develop our accounts with our own money. There will always be periods when the market is bad, and losses may be suffered. The focus always needs to be on long term performance, not on a bad month/month. You should give systems 12-24 months to show its true performance.

- **HOW CAN YOU GET A LOWER RISK?**

- - You can run our system on different accounts with different brokers we are affiliated with or will recommend and split your money. This will give you some protection from the problems which can occur on the broker's side, for example higher slippage, an increase in spread and low liquidity. You can also pay for our customized service which will give you a decreased risk in the system run. However, with the decreased risk there will be a lower monthly return and the minimum capital is 600\$.
